PRODUCT DESCRIPTION

- Live display style merchandises most effectively with different size drinks and prices
- Field proven, reliable impact delivery sensor detects the vend to cancel vend cycle.
- Patented learning mode for quick vending.
- A direct drive DC vend motor in each column drives each column's vend rotor.
- No vend mechanism adjustments are necessary to change from 12 oz. cans to 16 oz. or 20 oz. bottles. All that is needed is to change the depth setting in the programming and product retainers / rear spacers adjustments.
- User-friendly menu style programming.
- Hand Held Computer (HHC) programming and data retrieval.
- Real time clock / calendar to control built-in timer (can display time on LED).
- MERLIN IV supports Multi-Drop Bus coin mechanisms, bill validators, and card readers.
- Allows programmable space to sales: custom or factory settings.
- Capable of setting full escrow to vend (even if a column jams).
- External menu allows access to sales (vend) counts and error information.
- Both total (historical) and individual (resettable) vend and cash counters.
- MERLIN IV can display the sale (vend) and cash totals (historical) on the LED upon opening the vendors main door for easy access.
